

# Auth User Management API

This project is an authentication system built with Express (backend) and Vite (frontend). It includes user authentication features such as login, register, logout, and forgot password. **Tech Stack:** - Backend: Node.js (Express) - Frontend: React (Vite) - API-based architecture **How to Run:** 1. In the root directory, start the backend: `npm start` 2. Then, navigate to the frontend folder and start the frontend: `cd frontend npm run dev` **Contact:** - Email: [ozzencben@gmail.com](mailto:ozzencben@gmail.com) - LinkedIn: Özenç Dönmezer
